

Why Digital Online Certificate?

The online Digital Certificate ensures all the certificates related to the MaRRS International Spelling Bee are verified/verifiable certificates.

Anyone who wants to show the certificate, only needs to give the Candidate Identification Number (CIN) and all certificates related to that particular CIN will be displayed on the marrsspellingbee.com. This increases the authenticity of the certificate, as it is displayed on the official website. This would also prevent the production of fake certificates, for such certificates will not be displayed on the website.

Moreover the winner is also provided with the option of printing the certificate from the website if required. This can be done at home or at any digital printing shops.

As you would agree, this also adheres to the international trend of going green.

This initiative is intended to provide authentication and convenience to the winner besides trying to save the trees.
