

★ Program Highlights

- Structured online math testing program for Grades 1 to 9.
- Regular practice through monthly, quarterly, and half-yearly tests.
- Provides both continuous learning support and competitive exposure at the national level.
- Fully aligned with the NCERT syllabus and the National Education Policy (NEP) framework.
- We provide comprehensive study materials, practice tests and mock tests to ensure effective preparation.

★ Why This Program?

- Ensures consistent practice with weekly tests.
- Builds a strong foundation while improving problem-solving skills.
- Encourages confidence through progressive levels (Starter, Mover, Flyer).
- Recognizes achievers with medals and certificates at the national level.
- Provides instant feedback after each test.

★ Syllabus Design

- Based on the NCERT curriculum and aligned with NEP guidelines for holistic and competency-based learning.
- Core topics progress systematically from number sense and arithmetic in lower grades to algebra, geometry, probability, and data handling in higher grades.
- Each year introduces new topics, deeper applications, and higher-level problems.

★ Test Structure

- Starter Tests (Every Month): Four weekly online tests mapped to the school curriculum; focus on practicing fundamentals.
- Mover Tests (Once in 2 Months): Higher-level assessments to apply concepts in more challenging ways.
- Flyer Test (Once in 6 Months): The ultimate challenge with advanced analytical and problem-solving questions.
- Each test includes basic, intermediate, and advanced-level questions so that all students face a balanced challenge.
- To strengthen learning, each test also contains a few questions from previous sessions for revision and long-term retention.

★ Outcome:

A growth-focused journey that improves accuracy, problem-solving speed, builds confidence, and prepares students for advanced mathematics early.
