

100 INDIAN PERSONALITIES WHO INSPIRE

SCIENCE, TECHNOLOGY & DISCOVERY

1. C. V. Raman

Lifespan: 1888–1970

Biggest contribution: Discovery of the Raman Effect; Nobel Prize in Physics.

About: One of India's greatest physicists, Raman transformed the study of light through his research on light scattering. His life demonstrates how curiosity and observation can lead to major scientific discoveries.

Clues:

- I studied the behaviour of light.
- I discovered an effect involving scattered light.
- I won the Nobel Prize in Physics.

2. Jagadish Chandra Bose

Lifespan: 1858–1937

Biggest contribution: Pioneering research in radio/microwave science and plant physiology.

About: Bose was a pioneering scientist who worked in both physics and plant science. He developed sensitive instruments and conducted groundbreaking experiments on plant responses.

Clues:

- I studied radio and microwaves.
- I also studied how plants respond to stimuli.
- A famous scientific institution in Kolkata bears my name.

3. Satyendra Nath Bose

Lifespan: 1894–1974

Biggest contribution: Bose–Einstein statistics and foundations of quantum physics.

About: S.N. Bose was a brilliant Indian physicist whose work with Albert Einstein helped establish an important area of quantum mechanics. The particle family called **bosons** is named after him.

Clues:

- I worked in quantum physics.
- Albert Einstein worked with my ideas.
- A class of particles is named after me.

4. Homi J. Bhabha

Lifespan: 1909–1966

Biggest contribution: Foundation of India's nuclear science programme.

About: Bhabha was a leading nuclear physicist and one of the architects of modern scientific research in India. He helped establish institutions that became central to India's nuclear programme.

Clues:

- I was a nuclear physicist.
- I helped establish India's nuclear research programme.
- A major research centre in Mumbai is named after me.

5. Vikram Sarabhai

Lifespan: 1919–1971

Biggest contribution: Foundation of India's space programme.

About: Sarabhai believed space technology could be used to solve practical problems such as communication and education. He played a foundational role in building India's space research capabilities.

Clues:

- I helped start India's space programme.
- I believed space technology should serve society.
- I am often called the father of India's space programme.

6. A.P.J. Abdul Kalam

Lifespan: 1931–2015

Biggest contribution: India's space and missile programmes; inspiring young people.

About: A renowned aerospace scientist, Kalam worked on India's space and missile programmes before becoming the country's 11th President. He became particularly beloved for encouraging children to dream and innovate.

Clues:

- I was a scientist before becoming President.
- I worked with rockets and missiles.
- Children called me the People's President.

7. M. Visvesvaraya

Lifespan: 1861–1962

Biggest contribution: Engineering and water-management projects in India.

About: Sir M. Visvesvaraya was a celebrated engineer and statesman who contributed to irrigation, water supply and industrial development. His birthday is observed in India as Engineers' Day.

Clues:

- I was a famous Indian engineer.
- My work included dams and water management.
- Engineers in India celebrate a day associated with me.

8. Meghnad Saha

Lifespan: 1893–1956

Biggest contribution: Saha ionization equation in astrophysics.

About: Saha was an astrophysicist whose work helped scientists understand the physical conditions inside stars. His equation became an important tool in the study of stellar atmospheres.

Clues:

- I studied stars.
- I developed an important equation in astrophysics.
- My work helps explain the conditions inside stars.

9. M. S. Swaminathan

Lifespan: 1925–2023

Biggest contribution: Leadership in India's Green Revolution.

About: Swaminathan was an agricultural scientist who helped transform Indian agriculture. His work contributed to increased food production and agricultural self-sufficiency.

Clues:

- I was an agricultural scientist.
- I helped India's Green Revolution.
- My work focused on improving food security.

10. E. K. Janaki Ammal

Lifespan: 1897–1984

Biggest contribution: Pioneering work in botany, genetics and plant breeding.

About: Janaki Ammal was a pioneering Indian woman scientist whose research focused on plants, genetics and crop improvement. She achieved international recognition at a time when women had far fewer opportunities in science.

Clues:

- I studied plants.
- I worked in genetics and plant breeding.
- I was one of India's pioneering women scientists.

11. Tessy Thomas

Lifespan: 1963–present

Biggest contribution: Leadership in India's missile development programme.

About: Tessy Thomas is an aerospace scientist associated with India's missile programme. She became widely known as the “Missile Woman of India” and is an important STEM role model.

Clues:

- I am an aerospace scientist.
- I worked on missile systems.
- I am known as the Missile Woman of India.

12. Gagandeep Kang

Lifespan: 1962–present

Biggest contribution: Vaccine and infectious-disease research.

About: Gagandeep Kang is a leading Indian medical scientist whose research has focused on infectious diseases, vaccines and diseases affecting children. She has also contributed to strengthening scientific research in India.

Clues:

- I am a medical scientist.
- I have researched infectious diseases and vaccines.
- I became the first Indian woman elected to the Royal Society.

MATHEMATICS & LOGICAL THINKING

13. Aryabhata

Lifespan: c. 476–550

Biggest contribution: Foundational work in Indian mathematics and astronomy.

About: Aryabhata was an ancient Indian mathematician and astronomer whose work influenced mathematical astronomy. His *Aryabhatiya* contains important mathematical and astronomical ideas.

Clues:

- I lived more than 1,500 years ago.
- I was a mathematician and astronomer.
- India's first satellite was named after me.

14. Brahmagupta

Lifespan: c. 598–c. 668

Biggest contribution: Important rules for zero and negative numbers.

About: Brahmagupta was an influential Indian mathematician and astronomer. His work provided important rules for arithmetic involving zero and negative numbers.

Clues:

- I was an ancient Indian mathematician.
- I wrote important rules involving zero.
- I also studied astronomy.

15. Srinivasa Ramanujan

Lifespan: 1887–1920

Biggest contribution: Major contributions to number theory and mathematical analysis.

About: Ramanujan produced extraordinary mathematical results despite having limited formal training. His intuitive understanding of numbers made him one of the most celebrated mathematicians in history.

Clues:

- Numbers fascinated me from childhood.
- I worked extensively in number theory.
- The number 1729 is famously associated with me.

16. Shakuntala Devi

Lifespan: 1929–2013

Biggest contribution: Popularising mental mathematics.

About: Shakuntala Devi became internationally famous for her extraordinary ability to perform complicated calculations mentally. She showed millions of people that mathematics could be entertaining.

Clues:

- I could perform calculations extremely quickly.
- People called me the “Human Computer.”
- I wrote books about mathematics.

17. D. R. Kaprekar

Lifespan: 1905–1986

Biggest contribution: Discoveries in recreational mathematics, including Kaprekar's constant.

About: Kaprekar was an Indian mathematician who explored fascinating properties of numbers. His work demonstrated that mathematical discovery can come from experimentation and curiosity.

Clues:

- I loved exploring numbers.
- A famous number called 6174 is associated with me.
- My work is popular in recreational mathematics.

SPACE & EXPLORATION

18. Rakesh Sharma ●

Lifespan: 1949–present

Biggest contribution: First Indian citizen to travel into space.

About: Rakesh Sharma travelled into space in 1984 aboard Soyuz T-11. His mission became a landmark moment in India's space history.

Clues:

- I travelled into space in 1984.
- I was an Indian Air Force pilot.
- I was the first Indian citizen to travel into space.

19. Kalpana Chawla

Lifespan: 1962–2003

Biggest contribution: First woman of Indian origin to travel into space.

About: Born in Karnal, Kalpana Chawla became an astronaut and inspired millions with her journey from India to space. She remains an enduring symbol of ambition and perseverance.

Clues:

- I was born in Karnal.
- I became an astronaut.
- I travelled into space aboard NASA's Space Shuttle.

20. Sunita Williams ●

Lifespan: 1965–present

Biggest contribution: Long-duration spaceflight and spacewalks.

About: Sunita Williams is an astronaut of Indian and Slovenian heritage who has spent extended periods in space. Her career reflects discipline, scientific curiosity and exploration.

Clues:

- I am an astronaut.
- I have lived and worked aboard the International Space Station.
- I have performed spacewalks.

21. Satish Dhawan

Lifespan: 1920–2002

Biggest contribution: Development of India's space research programme.

About: Satish Dhawan was a leading aerospace engineer who succeeded Vikram Sarabhai as head of India's space programme. He helped build India's capabilities in satellite launch and space research.

Clues:

- I was an aerospace engineer.
- I led India's space programme after Vikram Sarabhai.
- A major space centre in Sriharikota is named after me.

MEDICINE & HEALTH

22. Dr. Devi Shetty ●

Lifespan: 1953–present

Biggest contribution: Making cardiac care more accessible and affordable.

About: Dr. Devi Shetty is a cardiac surgeon and healthcare entrepreneur. He has worked to make advanced cardiac treatment more accessible to a larger number of people.

Clues:

- I am a heart surgeon.
- I founded Narayana Health.
- I have worked to make cardiac treatment more affordable.

23. Dr. M. S. Valiathan

Lifespan: 1934–2024

Biggest contribution: Development of cardiac surgery and medical technology in India.

About: Valiathan was a pioneering cardiac surgeon and medical technologist. He contributed to the development of indigenous medical technology and surgical capabilities.

Clues:

- I was a heart surgeon.
- I worked on developing medical technology in India.
- I helped advance cardiac surgery.

24. Dr. Prathap C. Reddy ●

Lifespan: 1933–present

Biggest contribution: Development of modern private hospital care in India.

About: Dr. Prathap Reddy founded Apollo Hospitals and helped transform organised healthcare in India. His work contributed to making advanced medical care available across the country.

Clues:

- I am a doctor and healthcare entrepreneur.
- I founded Apollo Hospitals.
- I helped develop India's private hospital sector.

25. Dr. G. V. S. Murthy ●

Lifespan: 1960s–present

Biggest contribution: Public-health research and epidemiology.

About: Murthy is a public-health researcher associated with disability, health systems and epidemiological research. His work illustrates how medicine can improve the lives of communities, not just individual patients.

Clues:

- I work in public health.
- I study health problems affecting communities.
- My field combines medicine with research.

SPORTS

26. Dhyan Chand

Lifespan: 1905–1979

Biggest contribution: Elevating Indian hockey to international excellence.

About: Dhyan Chand is widely regarded as one of hockey's greatest players. His extraordinary skill helped India dominate international hockey during his era.

Clues:

- I played hockey.
- I represented India at the Olympics.
- I am often called the Wizard of Hockey.

27. Sachin Tendulkar ●

Lifespan: 1973–present

Biggest contribution: One of cricket's greatest international careers.

About: Sachin Tendulkar became one of the most celebrated cricketers in history through extraordinary consistency and longevity. He inspired generations of young cricket players.

Clues:

- I played cricket for India.
- I am called the Master Blaster.
- I scored 100 international centuries.

28. Kapil Dev ●

Lifespan: 1959–present

Biggest contribution: Leading India to its first Cricket World Cup victory.

About: Kapil Dev captained India when it won the 1983 Cricket World Cup. He became one of India's most influential all-round cricketers.

Clues:

- I was an Indian cricket captain.
- I led India to its first World Cup victory.
- I was a fast-bowling all-rounder.

29. P. T. Usha ●

Lifespan: 1964–present

Biggest contribution: Popularising Indian women's athletics.

About: P.T. Usha is one of India's most celebrated track athletes. Her international performances helped inspire a generation of Indian athletes, particularly young women.

Clues:

- I am an Indian athlete.
- My sport is running.
- I am popularly called the Payyoli Express.

30. Mary Kom ●

Lifespan: 1983–present

Biggest contribution: Multiple world championships in boxing and inspiring women in sport.

About: Mary Kom rose from Manipur to become one of the world's leading women boxers. Her journey is an example of determination and resilience.

Clues:

- I am a boxer.
- I have won multiple world championships.
- I come from Manipur.

31. Abhinav Bindra ●

Lifespan: 1982–present

Biggest contribution: India's first individual Olympic gold medal.

About: Abhinav Bindra won India's first individual Olympic gold medal in 2008. He is also known for promoting sports science and athlete development.

Clues:

- My sport involves precision shooting.
- I won Olympic gold in 2008.
- I was India's first individual Olympic gold medallist.

32. P. V. Sindhu ●

Lifespan: 1995–present

Biggest contribution: Olympic medals and global success in badminton.

About: P.V. Sindhu is one of India's most successful badminton players. Her Olympic achievements and consistency have made her an important sporting role model.

Clues:

- I play badminton.
- I have won two Olympic medals.
- I became a world champion.

33. Viswanathan Anand ●

Lifespan: 1969–present

Biggest contribution: India's first undisputed World Chess Champion.

About: Anand became a five-time World Chess Champion and helped popularise chess throughout India. His career demonstrates strategic thinking, preparation and composure.

Clues:

- My game has 64 squares.
- I became India's first undisputed world chess champion.
- I am known as the “Tiger of Madras.”

34. Neeraj Chopra ●

Lifespan: 1997–present

Biggest contribution: India's first Olympic athletics gold medal.

About: Neeraj Chopra became India's first Olympic champion in athletics by winning gold in the javelin throw. His discipline and consistency have made him a major sporting inspiration.

Clues:

- I compete in javelin throw.
- I won Olympic gold.
- I became India's first Olympic champion in athletics.

35. D. Gukesh ●

Lifespan: 2006–present

Biggest contribution: Youngest undisputed World Chess Champion.

About: Gukesh became the youngest undisputed World Chess Champion in 2024. His achievement is particularly inspiring to young learners because of his exceptional success at a young age.

Clues:

- I play chess.
- I became world champion at a very young age.
- I am an Indian grandmaster.

36. Mithali Raj ●

Lifespan: 1982–present

Biggest contribution: Leadership and record-breaking career in women's cricket.

About: Mithali Raj is one of the greatest women cricketers in Indian history. She captained India and played a major role in raising the profile of women's cricket.

Clues:

- I played cricket for India.
- I captained India's women's team.
- I became one of the highest run-scorers in women's international cricket.

BUSINESS & ENTREPRENEURSHIP

37. Jamsetji Tata

Lifespan: 1839–1904

Biggest contribution: Foundation of the Tata industrial legacy.

About: Jamsetji Tata was a pioneering Indian industrialist whose vision extended beyond business to education, science and nation-building. His vision laid the foundation for the Tata Group.

Clues:

- I was an early Indian industrialist.
- I founded the business legacy that became the Tata Group.
- I believed industry should contribute to nation-building.

38. J. R. D. Tata

Lifespan: 1904–1993

Biggest contribution: Development of Indian aviation and expansion of the Tata Group.

About: J.R.D. Tata was an industrialist, aviator and philanthropist. He played a major role in developing Indian aviation and expanding Tata enterprises.

Clues:

- I was India's first licensed pilot.
- I helped establish Tata Airlines.
- I led the Tata Group for several decades.

39. Dhirubhai Ambani

Lifespan: 1932–2002

Biggest contribution: Building Reliance into a major Indian business group.

About: Dhirubhai Ambani built a large business enterprise from modest beginnings. His story is often used to illustrate entrepreneurship, ambition and perseverance.

Clues:

- I founded Reliance.
- I began my entrepreneurial journey with limited resources.
- I built one of India's largest business groups.

40. Ratan Tata

Lifespan: 1937–2024

Biggest contribution: Global expansion of the Tata Group combined with philanthropy.

About: Ratan Tata led the Tata Group through a period of major international expansion. He was admired for his simplicity, philanthropy and emphasis on ethical leadership.

Clues:

- I led the Tata Group.
- I was known for philanthropy and humility.
- Tata companies expanded internationally during my leadership.

41. N. R. Narayana Murthy ●

Lifespan: 1946–present

Biggest contribution: Co-founding Infosys and promoting Indian technology services.

About: Narayana Murthy co-founded Infosys and helped establish India as a global technology-services hub. He is also known for advocating corporate governance and ethical business.

Clues:

- I co-founded Infosys.
- I worked in the technology industry.
- I am associated with ethical corporate governance.

42. Azim Premji ●

Lifespan: 1945–present

Biggest contribution: Building Wipro and major philanthropic support for education.

About: Azim Premji transformed Wipro into a major technology company and later devoted substantial resources to education and social development.

Clues:

- I led Wipro.
- I am a major philanthropist.
- Education is an important focus of my foundation.

43. Kiran Mazumdar-Shaw ●

Lifespan: 1953–present

Biggest contribution: Building Biocon and India's biotechnology industry.

About: Kiran Mazumdar-Shaw founded Biocon and became a pioneer of biotechnology entrepreneurship in India. Her career combines science, business and innovation.

Clues:

- I founded Biocon.
- I work in biotechnology.
- I am one of India's leading women entrepreneurs.

44. Falguni Nayar ●

Lifespan: 1963–present

Biggest contribution: Founding Nykaa and demonstrating late-career entrepreneurship.

About: Falguni Nayar moved from investment banking into entrepreneurship and founded Nykaa. Her story demonstrates that a new career or business journey can begin at any stage.

Clues:

- I founded Nykaa.
- I previously worked in finance.
- I became an entrepreneur after a long corporate career.

TECHNOLOGY & DIGITAL INDIA

45. Nandan Nilekani ●

Lifespan: 1955–present

Biggest contribution: Co-founding Infosys and helping develop Aadhaar infrastructure.

About: Nandan Nilekani is a technology entrepreneur and public-technology leader. He has played significant roles in both the Indian IT industry and large-scale digital infrastructure.

Clues:

- I co-founded Infosys.
- I played an important role in India's Aadhaar project.
- I work at the intersection of technology and public systems.

46. Satya Nadella ●

Lifespan: 1967–present

Biggest contribution: Leading Microsoft through a major cloud and technology transformation.

About: Satya Nadella is an Indian-born technology leader who became CEO of Microsoft. His career is an example of how technical expertise, empathy and leadership can combine.

Clues:

- I was born in Hyderabad.
- I became CEO of Microsoft.
- Cloud computing became a major focus under my leadership.

47. Sundar Pichai ●

Lifespan: 1972–present

Biggest contribution: Leadership of Google and Alphabet.

About: Sundar Pichai is an Indian-born technology executive who became CEO of Google and later Alphabet. His journey is particularly inspirational for students interested in technology.

Clues:

- I was born in Chennai.
- I became CEO of Google.
- I later became CEO of Alphabet.

48. Sam Pitroda ●

Lifespan: 1942–present

Biggest contribution: Telecommunications development and India's technology modernisation.

About: Sam Pitroda played a major role in India's telecommunications revolution and helped promote technology-led development. He became associated with India's early digital and telecom transformation.

Clues:

- I worked in telecommunications.
- I helped modernise India's telecom infrastructure.
- I was closely associated with India's technology missions.

LITERATURE & EDUCATION

49. Rabindranath Tagore

Lifespan: 1861–1941

Biggest contribution: Nobel Prize-winning literature and educational institution at Santiniketan.

About: Tagore was a poet, writer, philosopher, artist and educator. He became the first Asian Nobel laureate in Literature and founded Visva-Bharati.

Clues:

- I was a poet and writer.
- I won the Nobel Prize in Literature.
- I wrote the lyrics of India's national anthem.

50. R. K. Narayan

Lifespan: 1906–2001

Biggest contribution: Creating the fictional world of Malgudi.

About: R.K. Narayan was one of India's most widely read English-language authors. His stories about everyday life made Indian characters and settings accessible to readers around the world.

Clues:

- I was an Indian author.
- I created the fictional town of Malgudi.
- My stories often featured ordinary people.

51. Ruskin Bond

Lifespan: 1934–present

Biggest contribution: Beloved children's and nature writing.

About: Ruskin Bond is one of India's best-loved authors, particularly known for stories about childhood, nature and life in the hills. His simple writing has inspired generations of young readers.

Clues:

- I am an author.
- Many of my stories are set in the hills.
- I write extensively about children and nature.

52. Sudha Murty

Lifespan: 1950–present

Biggest contribution: Children's literature, philanthropy and education.

About: Sudha Murty is an author, educator and philanthropist whose simple stories often teach kindness, courage and wisdom. Her philanthropic work has supported education and social development.

Clues:

- I write books loved by children.
- I have worked extensively in philanthropy.
- I have a background in engineering and education.

53. Dr. Sarvepalli Radhakrishnan

Lifespan: 1888–1975

Biggest contribution: Philosophy and education; India's second President.

About: Radhakrishnan was a philosopher, teacher and statesman who became India's second President. His birthday is celebrated in India as Teachers' Day.

Clues:

- I was a philosopher and teacher.
- I became India's second President.
- Teachers' Day in India is celebrated on my birthday.

54. Savitribai Phule

Lifespan: 1831–1897

Biggest contribution: Pioneering women's education in India.

About: Savitribai Phule was one of India's earliest women teachers and a pioneering advocate for girls' education. She and Jyotirao Phule established schools for girls in the 19th century.

Clues:

- I was one of India's first women teachers.
- I worked to educate girls.
- I worked alongside Jyotirao Phule.

55. Jyotirao Phule

Lifespan: 1827–1890

Biggest contribution: Education and social reform.

About: Jyotirao Phule worked for education and social equality and helped establish schools for girls and marginalised communities. His reform work influenced later generations.

Clues:

- I was a social reformer.
- I worked for education.
- I helped establish schools for girls with Savitribai Phule.

ARTS, MUSIC & CULTURE

56. M. S. Subbulakshmi

Lifespan: 1916–2004

Biggest contribution: Bringing Carnatic music to national and international audiences.

About: M.S. Subbulakshmi was one of India's most celebrated classical singers. Her music earned international recognition, and she became the first musician to receive the Bharat Ratna.

Clues:

- I was a classical singer.
- I was associated with Carnatic music.
- I received the Bharat Ratna.

57. Pandit Ravi Shankar

Lifespan: 1920–2012

Biggest contribution: Taking Indian classical sitar music to the world.

About: Ravi Shankar was a legendary sitar player who introduced Indian classical music to audiences around the world. His international collaborations helped create wider interest in Indian music.

Clues:

- I was a musician.
- I played the sitar.
- I helped popularise Indian classical music internationally.

58. Ustad Bismillah Khan

Lifespan: 1916–2006

Biggest contribution: Popularising the shehnai as a classical concert instrument.

About: Bismillah Khan transformed the shehnai into a respected classical concert instrument. His performances became synonymous with India's musical heritage.

Clues:

- I was an Indian classical musician.
- I played the shehnai.
- I received the Bharat Ratna.

59. A. R. Rahman

Lifespan: 1967–present

Biggest contribution: Internationally acclaimed Indian film and music composition.

About: A.R. Rahman is a globally recognised composer whose music combines Indian traditions with modern sounds. His international honours helped bring Indian film music to new audiences.

Clues:

- I am a composer.
- I won two Academy Awards.
- I composed music for *Slumdog Millionaire*.

60. Satyajit Ray

Lifespan: 1921–1992

Biggest contribution: Internationally acclaimed Indian cinema.

About: Ray was a filmmaker, writer and illustrator whose films received major international recognition. He also created the popular detective character Feluda.

Clues:

- I was a filmmaker.
- I created Feluda.
- I received an Academy Honorary Award.

61. Lata Mangeshkar

Lifespan: 1929–2022

Biggest contribution: Transforming Indian playback singing.

About: Lata Mangeshkar was one of India's most influential playback singers. Her voice became part of the musical history of Indian cinema over many decades.

Clues:

- I was a famous playback singer.
- I sang in many Indian languages.
- I received the Bharat Ratna.

62. Zakir Hussain

Lifespan: 1951–2024

Biggest contribution: Global recognition of Indian tabla music.

About: Zakir Hussain was a world-renowned tabla virtuoso who collaborated with musicians across cultures. His work demonstrated how Indian classical music could connect with global musical traditions.

Clues:

- I was a famous percussionist.
- My instrument was the tabla.
- I collaborated with musicians from around the world.

DANCE & PERFORMING ARTS

63. Rukmini Devi Arundale

Lifespan: 1904–1986

Biggest contribution: Revival and institutional development of Bharatanatyam.

About: Rukmini Devi played a major role in bringing Bharatanatyam to new audiences and founded Kalakshetra. She helped establish classical dance as a respected cultural art form.

Clues:

- I was associated with classical Indian dance.
- I founded Kalakshetra.
- I helped popularise Bharatanatyam.

64. Birju Maharaj

Lifespan: 1938–2022

Biggest contribution: Global promotion of Kathak.

About: Pandit Birju Maharaj was one of India's greatest Kathak dancers and teachers. He helped introduce the richness of Kathak to audiences in India and abroad.

Clues:

- I was a classical dancer.
- My dance form was Kathak.
- I belonged to the Lucknow gharana tradition.

65. Kelucharan Mahapatra

Lifespan: 1926–2004

Biggest contribution: Revival and international recognition of Odissi.

About: Kelucharan Mahapatra was one of the most influential Odissi dancers and gurus. His teaching and choreography played a major role in establishing Odissi as a major Indian classical dance form.

Clues:

- I was a classical dancer.
- My dance form was Odissi.
- I helped establish Odissi on the international stage.

SOCIAL SERVICE & HUMANITARIAN WORK

66. Mother Teresa

Lifespan: 1910–1997

Biggest contribution: Humanitarian service to people living in poverty and illness.

About: Mother Teresa devoted her life to caring for people who were poor, sick and vulnerable. She founded the Missionaries of Charity and received the Nobel Peace Prize.

Clues:

- I devoted my life to helping people in need.
- I founded the Missionaries of Charity.
- I received the Nobel Peace Prize.

67. Vinoba Bhave

Lifespan: 1895–1982

Biggest contribution: Bhoodan movement for voluntary land donation.

About: Vinoba Bhave was a follower of Gandhi who promoted non-violent social reform. His Bhoodan movement encouraged landowners to voluntarily donate land to people without land.

Clues:

- I followed Gandhian principles.
- I started the Bhoodan movement.
- My movement involved voluntary land donation.

68. Baba Amte

Lifespan: 1914–2008

Biggest contribution: Service and rehabilitation of people affected by leprosy.

About: Baba Amte dedicated much of his life to helping people affected by leprosy and social exclusion. He founded Anandwan, a community focused on rehabilitation and self-reliance.

Clues:

- I worked with people affected by leprosy.
- I founded Anandwan.
- I believed people should be treated with dignity.

69. Kailash Satyarthi ●

Lifespan: 1954–present

Biggest contribution: Campaigning against child labour and for children's education.

About: Kailash Satyarthi has spent decades advocating for children's rights and freedom from exploitation. He received the Nobel Peace Prize in 2014.

Clues:

- I work for children's rights.
- I campaign against child labour.
- I received the Nobel Peace Prize.

70. Sindhutai Sapkal

Lifespan: 1948–2022

Biggest contribution: Care and rehabilitation of orphaned and abandoned children.

About: Sindhutai Sapkal devoted her life to caring for children without family support. Her extraordinary personal journey made her a powerful symbol of compassion and resilience.

Clues:

- I cared for orphaned and abandoned children.
- I was known for my work as a mother to many children.
- I became popularly known as the “Mother of Orphans.”

INNOVATION & SOCIAL ENTREPRENEURSHIP

71. Sonam Wangchuk ●

Lifespan: 1966–present

Biggest contribution: Educational innovation and artificial glaciers.

About: Sonam Wangchuk is an engineer, educator and innovator from Ladakh. His work includes educational reform and the development of “ice stupas” for water conservation.

Clues:

- I work in education and innovation.
- I come from Ladakh.
- I developed artificial glaciers called ice stupas.

72. Arunachalam Muruganantham ●

Lifespan: 1961–present

Biggest contribution: Affordable menstrual-hygiene technology.

About: Muruganantham developed low-cost machines for producing sanitary pads and promoted menstrual hygiene. His story is an example of solving a real social problem through practical innovation.

Clues:

- I developed a low-cost social innovation.
- My work concerns menstrual hygiene.
- My story inspired the film *Pad Man*.

73. Bunker Roy ●

Lifespan: 1945–present

Biggest contribution: Barefoot College and grassroots education.

About: Bunker Roy founded Barefoot College, which focuses on practical education and community empowerment. The organisation has trained people from rural communities in skills including solar engineering.

Clues:

- I founded Barefoot College.
- I focus on rural education.
- My work has trained rural women in solar technology.

74. Bezwada Wilson ●

Lifespan: 1966–present

Biggest contribution: Campaign against manual scavenging.

About: Bezwada Wilson has worked to end manual scavenging and improve the dignity and rights of sanitation workers. His work highlights social justice and human dignity.

Clues:

- I work for sanitation workers' rights.
- I campaign against manual scavenging.
- I founded an organisation working for their rights.

ENVIRONMENT & CONSERVATION

75. Sunderlal Bahuguna

Lifespan: 1927–2021

Biggest contribution: Chipko movement and environmental conservation.

About: Sunderlal Bahuguna was an environmentalist who became internationally associated with the Chipko movement. He advocated forest conservation and sustainable living.

Clues:

- I worked to protect forests.
- I was associated with the Chipko movement.
- My message emphasised protecting trees and nature.

76. Salim Ali

Lifespan: 1896–1987

Biggest contribution: Development of modern ornithology and bird conservation in India.

About: Salim Ali was India's most famous ornithologist. His extensive studies and books helped generations of Indians understand and appreciate birds.

Clues:

- I studied birds.
- I was known as the Birdman of India.
- I wrote important books about Indian birds.

77. M. C. Mehta

Lifespan: 1946–present

Biggest contribution: Environmental law and public-interest environmental litigation.

About: M.C. Mehta is an environmental lawyer known for using the courts to address major environmental issues. His work has influenced environmental protection and awareness in India.

Clues:

- I am a lawyer.
- I work to protect the environment.
- I have taken major environmental issues to court.

FREEDOM MOVEMENT & NATION BUILDING

78. Mahatma Gandhi

Lifespan: 1869–1948

Biggest contribution: Leadership of India's non-violent freedom movement.

About: Gandhi became one of the world's best-known advocates of non-violent resistance. His leadership was central to India's independence movement and influenced movements internationally.

Clues:

- I believed in non-violence.
- I played a major role in India's freedom movement.
- I am popularly known as Mahatma Gandhi.

79. Sardar Vallabhbhai Patel

Lifespan: 1875–1950

Biggest contribution: Political integration of princely states into India.

About: Patel played a crucial role in bringing hundreds of princely states into the Indian Union after independence. He is remembered as the “Iron Man of India.”

Clues:

- I helped unite India after independence.
- I am known as the Iron Man of India.
- The Statue of Unity is dedicated to me.

80. Subhas Chandra Bose

Lifespan: 1897–1945*

Biggest contribution: Leadership of the Indian National Army and revolutionary freedom movement.

About: Subhas Chandra Bose was a prominent leader of India's independence movement who sought to achieve freedom through a more militant approach. He is popularly remembered as Netaji.

Clues:

- People called me Netaji.
- I led the Indian National Army.
- My famous call was associated with “Give me blood...”

*His death circumstances remain historically disputed.

81. Bhagat Singh

Lifespan: 1907–1931

Biggest contribution: Revolutionary contribution to India's independence movement.

About: Bhagat Singh became one of the most recognisable young figures of India's freedom struggle. His courage, writings and commitment to independence made him a lasting symbol of youthful idealism.

Clues:

- I was a revolutionary.
- I became a symbol of youthful courage.
- I was executed by the British at a young age.

82. Sarojini Naidu

Lifespan: 1879–1949

Biggest contribution: Freedom movement, women's leadership and poetry.

About: Sarojini Naidu was a poet, freedom fighter and political leader. She became the first Indian woman president of the Indian National Congress and later the first woman Governor of an Indian state.

Clues:

- I was a poet.
- I took part in India's freedom movement.
- I was known as the Nightingale of India.

83. Annie Besant

Lifespan: 1847–1933

Biggest contribution: Home Rule movement and educational reform in India.

About: Annie Besant was an Irish-born theosophist, educator and Indian independence activist. She strongly supported Indian self-government and educational institutions.

Clues:

- I supported India's freedom movement.
- I was associated with the Home Rule movement.
- I was also an educationist.

WOMEN WHO CHANGED INDIA

84. Indira Gandhi

Lifespan: 1917–1984

Biggest contribution: Leadership as India's first and, to date, only woman Prime Minister.

About: Indira Gandhi was India's first woman Prime Minister and one of the country's most influential political leaders. Her career remains an important part of modern Indian history.

Clues:

- I was India's first woman Prime Minister.
- My father was India's first Prime Minister.
- I served as Prime Minister for multiple terms.

85. Kiran Bedi

Lifespan: 1949–present

Biggest contribution: Becoming India's first woman IPS officer and pioneering police reforms.

About: Kiran Bedi became the first woman to join the Indian Police Service. She became known for prison and police reforms and later served in public administration.

Clues:

- I was the first woman IPS officer in India.
- I worked in policing and prison reform.
- I later became a Lieutenant Governor.

86. Bachendri Pal

Lifespan: 1954–present

Biggest contribution: First Indian woman to climb Mount Everest.

About: Bachendri Pal became the first Indian woman to reach the summit of Mount Everest in 1984. She later worked to encourage adventure and leadership among young people.

Clues:

- I am a mountaineer.
- I climbed Mount Everest.
- I was the first Indian woman to reach its summit.

87. Arunima Sinha ●

Lifespan: 1988–present

Biggest contribution: First female amputee to climb Mount Everest.

About: Arunima Sinha overcame a life-changing injury and became the first female amputee to climb Mount Everest. Her story is a powerful example of perseverance and courage.

Clues:

- I am a mountaineer.
- I climbed Mount Everest.
- I became the first female amputee to reach its summit.

88. Dutee Chand ●

Lifespan: 1996–present

Biggest contribution: International Indian sprinting and advocacy for inclusion in sport.

About: Dutee Chand is an Indian sprinter who represented India internationally. Her career has also highlighted issues of equality and inclusion in sport.

Clues:

- I am an athlete.
- My event is sprinting.
- I represented India internationally.

EDUCATION, SCIENCE & SOCIAL REFORM

89. Anand Kumar ●

Lifespan: 1973–present

Biggest contribution: Super 30 education initiative for talented students from disadvantaged backgrounds.

About: Anand Kumar founded Super 30, an educational initiative that prepares talented students from economically disadvantaged backgrounds for competitive examinations. His work highlights the transformative power of education.

Clues:

- I am a mathematics educator.
- I founded Super 30.
- I help talented students prepare for competitive examinations.

Dr. Verghese Kurien

Lifespan: 1921–2012

Biggest contribution: India's White Revolution and dairy cooperative movement.

About: Kurien transformed India's dairy industry through cooperative models and helped make India a major milk producer. He is strongly associated with the development of Amul.

Clues:

- I worked in India's dairy sector.
- I helped lead the White Revolution.
- I am closely associated with Amul.

BUSINESS + SOCIAL IMPACT

91. Ela Bhatt

Lifespan: 1933–2022

Biggest contribution: Founding SEWA and empowering women workers.

About: Ela Bhatt founded the Self-Employed Women's Association (SEWA), which helped organise and support women working in the informal economy. Her work combined labour rights, financial inclusion and women's empowerment.

Clues:

- I worked for women's economic empowerment.
- I founded SEWA.
- I focused on self-employed women workers.

92. Muhammad Yunus

Lifespan: 1940–present

Biggest contribution: Microfinance and the Grameen Bank model.

About: Although born in Bangladesh rather than India, Yunus is included here as a South Asian social entrepreneur only if your definition includes the wider region. He pioneered microfinance and won the Nobel Peace Prize.

Clues:

- I developed a famous microfinance model.
- I founded Grameen Bank.
- I won the Nobel Peace Prize.

Important: For a strictly **Indian-personality** database, I recommend **replacing this entry**.

Suggested replacement:

92. Harish Hande

Lifespan: 1967–present

Biggest contribution: Solar energy access for underserved communities.

About: Harish Hande co-founded SELCO India and worked to make solar energy accessible to low-income communities. His work demonstrates how technology can address social problems.

Clues:

- I work with solar energy.
- I co-founded SELCO India.

- I focus on making clean energy accessible to underserved communities.

CINEMA & CREATIVE STORYTELLING

93. Aamir Khan ●

Lifespan: 1965–present

Biggest contribution: Influential Indian cinema and socially conscious storytelling.

About: Aamir Khan is an actor, filmmaker and producer known for films that often explore education, social issues and human relationships. His work has reached audiences both in India and internationally.

Clues:

- I am an actor and filmmaker.
- I acted in *3 Idiots*.
- I produced and starred in films dealing with social themes.

94. Amitabh Bachchan ●

Lifespan: 1942–present

Biggest contribution: Landmark career in Indian cinema.

About: Amitabh Bachchan is one of India's most influential actors, with a career spanning several decades. He has also become widely known through television and public service campaigns.

Clues:

- I am a famous Indian actor.
- I am known as the “Big B.”
- I hosted *Kaun Banega Crorepati*.

ARCHITECTURE & DESIGN

95. Charles Correa

Lifespan: 1930–2015

Biggest contribution: Modern Indian architecture suited to India's climate and culture.

About: Charles Correa was one of India's most influential architects. His work combined modern architectural ideas with Indian climate, culture and social needs.

Clues:

- I was an architect.
- I designed buildings in India and internationally.
- I was known for combining modern design with Indian conditions.

96. Balkrishna Doshi

Lifespan: 1927–2023

Biggest contribution: Human-centred modern architecture in India.

About: B.V. Doshi was an internationally recognised architect whose work emphasised community, climate and human experience. He became the first Indian architect to receive the Pritzker Architecture Prize.

Clues:

- I was an architect.
- I designed buildings with people and communities in mind.
- I won the Pritzker Architecture Prize.

SCIENCE, INNOVATION & MODERN INDIA

97. E. Sreedharan ●

Lifespan: 1932–present

Biggest contribution: Major infrastructure projects including the Konkan Railway and Delhi Metro.

About: E. Sreedharan is an engineer celebrated for leading major infrastructure projects in India. His work on the Delhi Metro became a model for efficient urban transport.

Clues:

- I am an engineer.
- I played a major role in the Delhi Metro.
- I am popularly called the Metro Man of India.

98. Narinder Singh Kapany

Lifespan: 1926–2020

Biggest contribution: Pioneering development of fibre optics.

About: Narinder Singh Kapany was an Indian-born physicist whose work helped establish the foundations of fibre-optic technology. He is widely associated with the early development of optical fibre.

Clues:

- I worked with light travelling through fibres.
- My research contributed to fibre-optic technology.
- I am often called the father of fibre optics.

99. Deepak Dhar ●

Lifespan: 1951–present

Biggest contribution: Major contributions to statistical physics and complex systems.

About: Deepak Dhar is a leading Indian theoretical physicist whose work has contributed to the understanding of statistical physics and complex systems. In 2026, he received the Dirac Medal, adding a current example of Indian scientific excellence to this list. ([The Economic Times](#))

Clues:

- I am a theoretical physicist.
- I study complex systems and statistical physics.
- I received the Dirac Medal in 2026.

100. Sonam Wangchuk

Lifespan: 1966–present

Biggest contribution: Educational innovation and climate-adaptation solutions.

About: Sonam Wangchuk is an engineer and education reformer from Ladakh. His innovations, including artificial glaciers, demonstrate how local knowledge, science and creativity can solve real-world problems.

Clues:

- I am associated with Ladakh.
- I work in education and innovation.
- I developed “ice stupas” to conserve water.

A Note on the 100-Personality Database

For **MaRRS**, I would recommend keeping **five separate fields** in the master database:

Field	Example
Personality	C.V. Raman
Domain	Science
Lifespan	1888–1970
Biggest Contribution	Raman Effect
3 Clues	Light / Scattering / Nobel Prize

Then add three more fields:

Currently Active? → Yes/No

Value Represented → Curiosity / Courage / Perseverance / Service etc.

Suitable Age → Preschool / Grades 1–3 / Grades 4–6 / Grades 7–10

This would make the database immediately usable for “**Who Am I?**”, **picture recognition**, **Match the Personality**, **Multiple Choice**, **audio clues**, **storytelling** and **oral rounds**.

One correction worth flagging: I have **not treated every living person as “currently active” merely because they are alive**; the ● designation is intended for people who remain publicly active or professionally relevant as of 2026. Also, the list is deliberately educational rather than a ranking of “greatest Indians.” The Government’s own Padma framework recognises achievements across many fields rather than one single hierarchy of achievement.

If this is going to become a **MaRRS Preschool Bee–Humanities question bank**, the next useful step would be to expand these 100 into a **spreadsheet-ready master table with 10 columns: Personality | Domain | Birth | Death | Active | Biggest Contribution | 2-line Bio | Clue 1 | Clue 2 | Clue 3**, which would make it directly usable for content development.

The aim should be to test: “Can the child recognise an inspiring Indian personality and understand what he/she is known for?”

Suggested Question Formats for MaRRS Preschool Bee – Humanities

1. Who Am I? – 3 Clues

Give three very simple clues.

Example:

Q. Who am I?

- ♦ I loved numbers.
- ♦ I was a great mathematician.
- ♦ The number 1729 is connected with me.

- A. C. V. Raman
- B. Srinivasa Ramanujan
- C. Mahatma Gandhi
- D. Sachin Tendulkar

Answer: B. Srinivasa Ramanujan

2. Who Am I? – Picture + Clue

Show a photograph of the personality and give one clue.

Q. Who is this famous Indian?

 [Picture of A.P.J. Abdul Kalam]

Clue: I was a scientist and later became the President of India.

- A. A.P.J. Abdul Kalam
- B. Ratan Tata
- C. Neeraj Chopra
- D. C.V. Raman

This would be particularly effective for KG.

3. Match the Person with What They Are Famous For

Person	Famous For
1. Neeraj Chopra	A. Space
2. A.P.J. Abdul Kalam	B. Javelin
3. Ramanujan	C. Mathematics

Answer:

1–B, 2–A, 3–C

For Senior KG, use **pictures/icons instead of text wherever possible**.

Javelin

Space

Mathematics

4. Who Belongs to This Field?

Q. Who is famous for playing cricket?

- A. Sachin Tendulkar
 - B. C.V. Raman
 - C. Rukmini Devi
 - D. Ramanujan
-

5. Picture – Choose the Correct Name

Show four photographs.

Q. Which person is Mahatma Gandhi?

- A. Person 1
- B. Person 2
- C. Person 3
- D. Person 4

This is an excellent **visual recognition round**.

6. Which Object Belongs to the Personality?

Q. Which object would you associate with Neeraj Chopra?

- A.  Cricket bat
- B.  Javelin
- C.  Piano
- D.  Telescope

Answer: B

7. Complete the Sentence

Q. Neeraj Chopra is famous for _____.

- A. Cricket
 - B. Javelin
 - C. Singing
 - D. Painting
-

8. Personality + Country/Identity

Keep it very simple.

Q. Mahatma Gandhi was a famous _____.

- A. Indian
- B. American
- C. Australian
- D. Japanese

Or:

Q. Which country did A.P.J. Abdul Kalam belong to?

-  India
 -  Japan
 -  France
 -  Brazil
-

9. What Did They Do?

Q. What did C.V. Raman study?

- A. Light
 - B. Cricket
 - C. Dance
 - D. Mountains
-

10. Who Helped Children?

This can introduce **values** rather than just achievements.

Q. Who worked to help poor and needy people?

- A. Mother Teresa
 - B. Sachin Tendulkar
 - C. Ramanujan
 - D. Neeraj Chopra
-

11. Find the Odd One Out

Q. Which one is different?

- A. Sachin Tendulkar – Cricket
- B. Neeraj Chopra – Javelin
- C. P.V. Sindhu – Badminton
- D. C.V. Raman – Cricket

Answer: D

This introduces basic classification.

12. Which Pair is Correct?

Q. Which pair is correct?

- A. Ramanujan – Mathematics
- B. Sachin Tendulkar – Space
- C. Neeraj Chopra – Singing
- D. A.R. Rahman – Cricket

Answer: A

13. Listen and Identify

This would be a particularly strong **MaRRS Preschool Bee oral round**.

The child hears:

“I am a famous Indian who played cricket. I am known as the Master Blaster.”

Who am I?

- A. Sachin Tendulkar
 - B. Rakesh Sharma
 - C. Ramanujan
 - D. C.V. Raman
-

14. Audio – Identify the Field

Q. I am a famous Indian. I use a javelin to compete. What is my field?

- A. Sports
 - B. Science
 - C. Music
 - D. Painting
-

15. What Would You Use?

Q. If you want to play the sport Neeraj Chopra is famous for, what would you need?

- A.  Bat
 - B.  Javelin
 - C.  Football
 - D.  Racket
-

16. Personality and Achievement

Q. Who was the first Indian citizen to travel into space?

- A. Rakesh Sharma
- B. Sachin Tendulkar
- C. Ramanujan
- D. A.R. Rahman

For KG, I would **avoid giving the year**.

17. Who Is the Scientist?

Show four pictures.

Q. Which person is a famous scientist?

- A. *[Sachin Tendulkar]*
 - B. *[C.V. Raman]*
 - C. *[A.R. Rahman]*
 - D. *[Neeraj Chopra]*
-

18. Which One is a Sportsperson?

- A. C.V. Raman
 - B. Ramanujan
 - C. P.V. Sindhu
 - D. Rabindranath Tagore
-

19. Which One is a Writer?

- A. Ruskin Bond
 - B. Neeraj Chopra
 - C. Rakesh Sharma
 - D. C.V. Raman
-

20. Who Am I? – Progressive Clues

This could become a **signature MaRRS round**.

Start with the least obvious clue and gradually reveal more.

Q. Who am I?

Clue 1: I am from India.

Clue 2: I play a sport.

Clue 3: I throw a javelin.

Clue 4: I won an Olympic gold medal.

Answer: Neer

A More Fun Format for Senior KG

I would recommend creating **6 distinct rounds** rather than having all questions as MCQs.

Round 1 – 👁️ Look & Recognise

Picture recognition.

Round 2 – 🧐 Who Am I?

Three simple clues.

Round 3 – 🔗 Match Me

Person → field/object/achievement.

Round 4 – 🎯 What Am I Famous For?

Person → contribution.

Round 5 – 🎧 Listen & Guess

Audio clues/oral questions.

Round 6 – ★ Inspiration Round

Simple questions connecting personalities with values.

For example:

Q. Neeraj Chopra practised hard to become a champion. Which quality does this show?

- A. Laziness
- B. Hard work
- C. Fear
- D. Anger

Answer: B. Hard work

[PHOTO]

Who is this?

- ♦ He was a famous Indian scientist.
- ♦ He studied light.
- ♦ He won the Nobel Prize.

A. C.V. Raman B. Sachin Tendulkar C. Ramanujan D. Ratan Tata

For historical personalities, photographs are available for many of them from institutional or public-domain collections. For example, the C.V. Raman photograph in the Wikimedia Commons collection is identified as coming from the Nobel Foundation and is marked public domain; other historical portraits are held by institutions such as the Royal Society.

88. Bezwada Wilson

89. Sunderlal Bahuguna

90. Salim Ali

91. M. C. Mehta

92. Bachendri Pal

93. Arunima Sinha

94. Dutee Chand

95. Anand Kumar

96. Ela Bhatt

97. Deepak Dhar

98. Narinder Singh Kapany

99. Muhammad Yunus

100. Sonam Wangchuk — duplicate in the earlier list

The previous 100-personality list accidentally included **Sonam Wangchuk twice (#71 and #100)**. Rather than silently changing the personality list, I have shown the duplicate here.

For the **final MaRRS database**, I recommend replacing the duplicate with another highly recognisable Indian personality—ideally someone particularly suitable for **age 5**, such as **Sudha Chandran, Milkha Singh, or P. T. Usha**.

Absolutely. For the **MaRRS Preschool Bee – Humanities Personality Picture Bank**, I suggest using **clear, child-friendly photographs with one personality per image**, rather than collages. This will make the images directly usable for “Who Am I?”, picture recognition, clue rounds and oral rounds.

I have also corrected the earlier list by replacing the duplicate **Sonam Wangchuk** entry with **Milkha Singh**.

1. Science, Mathematics & Space

- 1. C. V. Raman**
 - 2. Jagadish Chandra Bose**
 - 3. Satyendra Nath Bose**
 - 4. Homi J. Bhabha**
 - 5. Vikram Sarabhai**

 - 6. A. P. J. Abdul Kalam**
