Where can you find whales in a desert?

Animals Through Time Unit

Lesson 1 of 3

Habitats, Fossils, & Environments Over Time

★ 4.7 (20728 reviews)

Activity Prep

In this lesson, students explore the idea that the rock under our feet sometimes contains fossils, and investigate how these fossils reveal changes in habitats through time. In the activity, Fossil Dig, students use paper to create a model fossil dig. They identify traits of fossils to determine what the habitat looked like when these organisms were alive. Then they use this information to figure out where some Mystery Fossils belong in their fossil dig.

I'm **not using** a Mystery Pack ✓

<u>Fossil Dig</u> printout	Print 30 copies
<u>Fossil Dig Answer Key</u> teacher-only resource	1 copy
<u>Fossil Dig Questions</u> worksheet	30 copies
<u>Mystery Fossils</u> printout	Print 15 copies
Glue Sticks	30 glue sticks
Scissors	30 pairs
Dot Stickers <i>We prefer stickers because they are easier to distribute in a classroom. Tape will also work.</i>	<u>Details</u>

Prep Instructions

We suggest students work in pairs. Homeschool students can work on their own.

Prepare Dot Stickers

Each student will need three stickers. You can prepare these beforehand for easier distribution.

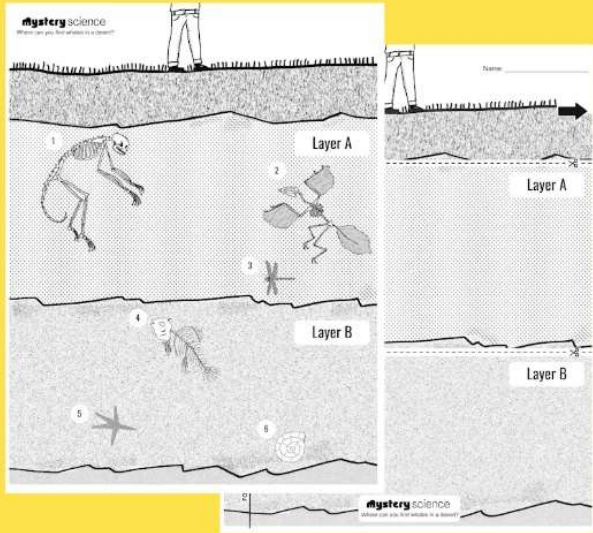

Prepare Mystery Fossils

Each student will need a 1/2 page of Mystery Fossils. We suggest you cut these in half prior to class.

Organize Supplies

Materials for this activity are needed at two different steps, so we suggest organizing them beforehand for easier distribution. Students need these supplies in **Step 2**:

EACH PERSON NEEDS:

Fossil Dig sheets
(2 pages)

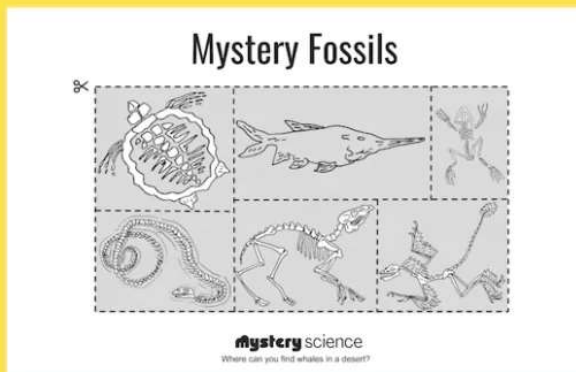

Scissors

3 Stickers

Then you'll distribute the remaining supplies in **Step 11.**

EACH PERSON NEEDS:

Mystery Fossils sheet

Glue Stick
